Introduction

The H2O Audio Amphibx Fit Waterproof Armband allows you to utilize all of your favorite features on the iPhone®, iPod touch®, most other MP3 players and mobile phones in, around and underwater.

Using Your Waterproof Armband

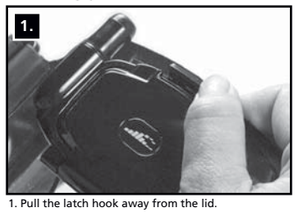
We have tested your Amphibx Fit to be waterproof to a depth of 12 ft. prior to making its' way to you. Even so, we strongly recommend you test it yourself according to the following instructions to make sure you understand how to properly prepare it for use in the water. We recommend that you test the product without a phone or media player inside before initial use.

1. Open the LatchTight Locking Lid.
2. Verify the seal area is clean and free of debris or damage.
3. Close and lock the case without a phone or media player inside.
4. Attach H2O Audio Waterproof Headphones (sold separately) to the SealTight Connector Boot
5. Submerge the system in water and soak for 30 min.
6. Manipulate the pouch during submersion.
7. Remove from water and dry exterior so water does not fall inside when opened.
8. Before opening, check to see if there is water inside the armband.
9. Open the case and ensure there is no water inside.

Do not use if water is found inside the Armband.

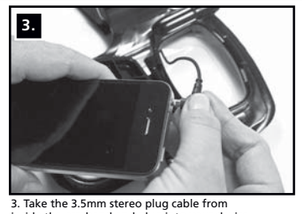
Please contact H2O Audio Customer Support immediately.

Installing your Device



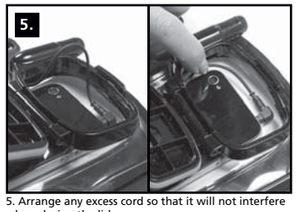
1. Pull the latch hook away from the lid.

2. Holding latch hook open, lift on the tab of the lid.

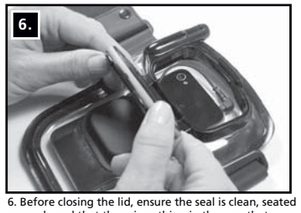


3. Take the 3.5mm stereo plug cable from inside the armband and plug into your device.

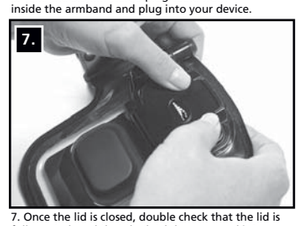
4. Slide device inside and align device in the ClearTouch Pouch. **Note: To use your device's camera in the Amphibx Fit, orient the device in the armband to ensure the camera lens is visible through the ClearTouch Pouch.**



5. Arrange any excess cord so that it will not interfere when closing the lid.



6. Before closing the lid, ensure the seal is clean, seated properly and that there is nothing in the way that would prevent the lid from fully closing (for example the 3.5mm stereo plug cable). Close lid.



7. Once the lid is closed, double check that the lid is fully seated, and that the latch has snapped into place. Failure to do so could cause the lid to open during use.

8. Always check your armband for obvious signs of wear and check with Customer Service if you have any questions about the condition of your armband. **If you take care of your Amphibx Fit, it will take care of you!**

Checking the Waterproof Seal

The H2O Audio Amphibx Fit Waterproof Armband features a removable, blue, seal that forms a waterproof barrier between the base and lid of the armband.

It is extremely important that special attention is paid to ensure the seal is completely seated in the groove of the lid. If the seal is loose, out of alignment, twisted or pinched in any way, it will compromise the waterproof integrity of the armband and should not be used. Any debris such as hair, sand, surf wax or mud will prevent it from forming a watertight barrier and should be cleaned off before use.

It is extremely important that you ensure the seal is clean and properly seated each time you close the lid. Failure to do so may ruin your device in the armband.

If the seal comes out of alignment, carefully place it back into the groove, ensuring all 4 corners are correctly installed. Close the lid into the base and then re-open it to make sure the seal is fitted correctly into the groove. The seal should appear straight and uniform along all edges and should not fall out easily.

If you have any concerns please contact H2O Audio Customer Support.

Checking the Waterproof Welds

In addition to the waterproof seal in the lid, the H2O Audio Amphibx Fit Waterproof Armband features welded outer seams that have been specifically designed to prevent water from entering the armband.

Each H2O Audio armband is inspected and tested in a pressure chamber to ensure it is 100% waterproof prior to packaging.

Even with this level of care, you still need to ensure the welds have not been damaged by your activities.

Take a moment to look at the waterproof welds upon arrival. You should perform a visual inspection of the welds each time you install your device in the armband.

Connecting Your Headphones

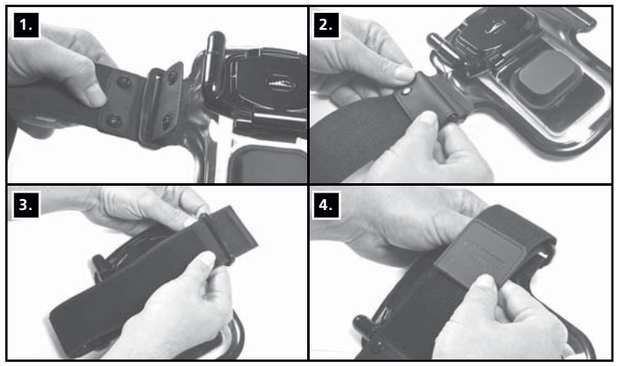
The SealTight Connector Boot featured on the H2O Audio Amphibx Fit Waterproof Armband is designed to create a 100% waterproof connection with H2O Audio Waterproof Headphones (sold separately). If a SealTight Connector Boot is NOT installed the connection is NOT Waterproof.

The armband should not be submerged under water for long periods of time without H2O Audio Waterproof Headphones plugged in as water could enter the armband through the headphone jack.

H2O Audio waterproof headphones come with a strain relief in 2 different sizes. We have included 2 SealTight Connector Boots for you to use based upon which H2O Audio Waterproof Headphones you have. Please see the images shown to see which boot goes with which headphone plug.

Installing removable Sport Armstrap

The H2O Audio Amphibx Fit Waterproof Armband features a removable armstrap. Attach the armstrap to the armband as shown. **Note: Once fully assembled, slide armband up into place on arm and tighten armstrap.**



Controlling Your iPhone, iPod touch, or other devices

The ClearTouch Pouch has been engineered to allow you to maintain complete control over touch controls and push buttons featured on your device.

The ClearTouch Pouch was designed to be clear on both side so when oriented properly, it allows you to use the camera on most devices including all iPhone models, the iPod touch (4th Gen.) and many other devices.

Maintaining Your Amphibx Fit Waterproof Armband

Waterproof Armband

Your Amphibx Fit was specifically engineered to be durable enough to handle damaging environments such the pool, ocean, rain, and mud, yet made to be light enough for everyday uses such as running, swimming, biking, hiking, and just relaxing at the beach. With that said, it is not indestructible, so you need to use reasonable care when using the Amphibx Fit.

With so many environments, and so many uses, the one common message is that you should always check the Amphibx Fit before use to make sure it was not damaged during your last activity.

Do not expose the armband to extreme heat, such as the inside of a hot car, or in hot direct sunlight, such as on a beach, or boat deck. Doing so may cause damage and subsequent flooding.

After in-water use, you should rinse off your armband off with clean water and let it air dry for your next use. Strong detergents, soaps, and chemicals must never be used to clean the armband. For long-term storage, store out of direct sunlight.

Waterproof Seal

To clean the seal, remove it from the armband and wash with warm fresh water. Strong detergents, soaps, and chemicals should never be used to clean the seal. Allow seal to air dry and install back into the armband once dry. The life of a waterproof seal is typically one year. Please contact H2O Audio Customer Support for replacement seals.

The silicone seal does not require lubrication.
Do not use silicone grease to lubricate the seal.

FAQs

1. What MP3 players and phones are compatible with this armband?

The Amphibx Fit, Large armband was designed specifically for the Apple iPhone and iPod touch devices. However many smart phones and portable media players will fit into this armband because of the generous size of the opening and the flexible materials used. If your device does not fit, please let us know so we can consider it for future products.

2. What happens if the waterproof headphones become disconnected from the armband?

As long as the armband is not submerged underwater for long periods of time, it should be fine. The longer the armband is submerged underwater, the higher the possibility water can enter the armband through the stereo jack. If headphones detach from the armband, we suggest getting that connection back together as soon as possible.

4. What headphones are compatible with H2O Audio Waterproof Cases?

H2O Audio Waterproof Armbands are designed to work with H2O Audio Waterproof Headphones and standard 3.5mm headphones.

The armband should not be submerged underwater for long periods of time without H2O Audio Waterproof Headphones plugged in as water may be able to enter the armband through the stereo jack.

5. Can H2O Audio Waterproof Armbands be taken into a hot tub or sauna?

Sometimes. Since we do not control the laws of physics, so you should continuously check to see if condensation is forming inside the armband. This amount will vary from location to location based upon the humidity in the air when the armband was originally closed. ***If any condensation becomes visible within the armband, STOP use immediately.***

Safety Information

Please read this manual carefully. If you have any questions please contact H2O Audio Customer Service prior to use.

Improper use of this system may cause the user to make mistakes or decisions that may lead to serious injury or death.

Always make sure to have the audio player volume turned to zero and the headphones turned away from the ears when turning on the audio player. If the volume level is not zero when the audio player is turned on, it may cause ear injury due to a sudden burst of volume. The volume should be slowly increased with an audio track playing to set the speaker volume to comfortable output levels prior to positioning the headphones next to the ears. Hearing experts advise against continuously loud and extended play. If you experience ringing in your ears, reduce volume or discontinue use.

It can be potentially dangerous to use headphones while engaging in activities that require your full attention. You should exercise extreme caution or discontinue use in potentially hazardous situations. Do not use headphones while driving, cycling, or operating any motorized vehicle. It may create a traffic hazard and is illegal in some areas. Those users that elect to utilize this system at, or near, the water's surface, must maintain safety awareness of moving water crafts.

WARNING: Contains small parts which may be a choking hazard. Not suitable for children under 3 years old.

1 Year Limited Warranty

H2O Audio's 1 year limited warranty covers defects in materials and/or workmanship of all H2O Audio branded product 1 year from the date of original purchase. This warranty does not apply to any products which have been neglected, altered, abused, used for a purpose other than the one for which they were manufactured, repaired by customer or any party without H2O Audio's written authorization, or used in any manner inconsistent with H2O Audio's instructions. Please refer to the care and maintenance instructions for more details. Product Manuals are available for download on the H2O Audio website as well as packaged with the product.

Products must be purchased from an Authorized Dealer. This limited warranty is not valid for product purchased through an unauthorized source. For a directory of H2O Audio Authorized Dealers, please visit the store locator section on the company website. If you have questions as to whether or not a dealer is authorized, please contact Customer Support.

H2O Audio will, at its sole discretion and without charging the customer, repair or replace any product components that fail in normal use during the limited warranty period. The customer will be responsible for the cost of shipping the product to H2O Audio. H2O Audio will pay the cost of returning the repaired or replacement product to the customer. IN NO EVENT WILL H2O AUDIO'S LIABILITY TO CUSTOMER EXCEED THE PURCHASE PRICE OF THE SPECIFIC PRODUCT SUBJECT TO THE WARRANTY CLAIM.

The warranty is valid only for the original owner who purchases the product from an Authorized Dealer. Transfers are not qualified for warranty protection.

H2O Audio reserves the right to replace any out-of-stock, discontinued, or limited edition product with a comparable product. Discontinued products may not be available for warranty replacement.

TO THE EXTENT PERMITTED BY LAW, THIS WARRANTY IS THE SOLE AND EXCLUSIVE REMEDY AND IS IN LIEU OF ANY OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. IN NO EVENT SHALL H2O AUDIO BE LIABLE FOR ANY INDIRECT, PUNITIVE, INCIDENTAL OR CONSEQUENTIAL DAMAGES, PERSONAL PROPERTY CLAIMS REGARDING THIRD PARTY PRODUCTS, OR SPECIAL DAMAGES, REGARDLESS OF WHETHER A CLAIM FOR SUCH DAMAGES IS BASED ON WARRANTY, CONTRACT, NEGLIGENCE OR OTHERWISE. SOME STATES DO NOT ALLOW A LIMITATION ON THE DURATION OF IMPLIED WARRANTIES OR THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATIONS OR EXCLUSIONS MAY NOT APPLY TO YOU.

Return Authorization

Prior to any return, a Return Authorization (RA) number must be obtained. To receive an RA number, go online to www.h2oaudio.com/ra and follow the instructions on how to return a product. Proof of purchase from an Authorized Dealer will be required.
